

Tyler Bithell

Lead Architect | Atlanta, GA | (706) 570-3886 | tylerbithell@outlook.com

SUMMARY

Lead Architect with 22+ years of experience delivering cloud, AI-enabled, and large-scale integration solutions. Known for reliable delivery—driving execution from architecture through release—while modernizing enterprise systems, leading high-performing onshore/offshore teams, and accelerating quality and speed with DevOps and AI-assisted engineering. Motivated to apply these strengths to solve meaningful, real-world problems and deliver outcomes that make a positive impact.

CORE SKILLS

Cloud/Microsoft: Azure; Microsoft 365 (M365); Microsoft Graph; SharePoint Online (CSOM/REST); SharePoint Framework (SPFx); SharePoint Embedded

DevOps/Delivery: Azure DevOps; GitHub Enterprise; CI/CD; Agile; SAgile; release management; vendor/stakeholder management

Languages: C#; JavaScript; TypeScript; Node.js; React; AngularJS

Analytics: Power BI

AI Engineering: Advanced prompt engineering; system prompting (design/tuning input); LLM provider APIs (OpenAI/Azure OpenAI and similar); RAG concepts (embeddings, vector retrieval); familiarity with eval/guardrails (quality/safety/cost)

AI Tools: GitHub Copilot; Cursor, Claude Code

Certifications: GitHub Copilot; SAgile 5 Agilist; Azure Developer Associate; Azure Solutions Architect Expert; Azure Data Engineer Associate, Azure Security Engineer Associate, Microsoft Specialist - Programming in HTML5 with JavaScript and CSS3

EXPERIENCE

LEAD ARCHITECT

Deloitte, Atlanta, GA / Oct 2020 – Present

- Own target-state architecture for Audit Platform ↔ SaaS communications; defined integration patterns and non-functional requirements (NFRs) (throttling, reliability, performance/cost), delivering outcomes including ~50% fewer queries
- Drove AI-assisted engineering rollout, contributing to 95% GitHub Copilot adoption across the program
- Implement agent-enabled “shift-left” quality with a robust local testing suite to prevent defects from escaping development environments
- Lead 40+ member onshore/offshore Agile teams, mentored engineers, manage CI/CD releases, and partner with SaaS vendors/stakeholders to meet Deloitte requirements
- Operationalize AI agent workflows for design/documentation/mermaid diagrams and code reviews.
- Community leadership: Impact Day site lead and Zero Waste Champion for 3 years.

CHIEF TECHNICAL ARCHITECT - PORTALS

B2B Technologies, LLC, Atlanta, GA / Dec 2008 – Oct 2020

- Architect complex on-prem and cloud systems
- Migrate on-prem solutions to Microsoft Azure and MS 365
- Integrate MS365 with new and existing applications
- Deliver Microsoft-funded Azure DevOps and Power BI trainings
- Ramp up quickly on complex engagements
- Speak at and help plan Microsoft community events

SOFTWARE DEVELOPER

TSYS, Columbus, GA / Jul 2003 - Dec 2008

- Develop software solutions and administer databases
- Administer SharePoint portal, custom solutions, and training
- Maintain TSYS public website
- Install, upgrade, and support internal software solutions

PROJECT HIGHLIGHTS

OMNIA – DELOITTE

Various Cloud Solutions

- Brought on as Senior Consultant to resolve SaaS integration and throttling issues, improving query efficiency and reliability
- Drove adoption of webhooks and newer, more efficient APIs, reducing total queries by ~50%
- Continuously optimized query patterns, regularly implementing more efficient integration approaches
- Partnered with the SaaS vendor to design and deliver new integration solutions
- Promoted to Application Architect and later Solution Architect; owned target-state architecture and built a centralized service to manage all SaaS communications
- Independently designed and delivered a new SDK that fully replaced legacy SaaS communications and enabled an upgraded product offering
- Led the SDK through the Secure Software Development Lifecycle (SSDLC) and helped shape vendor product direction
- Built proficiency with emerging AI coding tools to accelerate delivery and quality
- After global Audit Platform integration, assumed ownership of five additional domains

PUBLIC WEBSITE STAFF PROFILES – PUBLIC UNIVERSITY

MS Graph, SharePoint Online, NodeJS, Azure Functions, Azure Storage, Azure AD, Azure Logic Apps

- Designed and implemented a WordPress integration that eliminated faculty/staff WordPress accounts by sourcing profiles from Microsoft 365 (Azure Active Directory and a SharePoint Online list)
- Built an Azure Logic Apps/Azure Functions pipeline to aggregate profile data into Azure Table Storage
- Published profile JSON to Azure Table Storage for WordPress consumption

ESTABLISHED DEVELOPMENT TEAM – POULTRY MANUFACTURER

MS Azure, C#, SharePoint, MVC, AngularJS, Azure DevOps

- Brought in to address imminent loss of a development team supporting a proprietary material requirement planning (MRP) system (team departing within one week)
- Rapidly onboarded, assumed system ownership, and stabilized delivery continuity
- Established a new development team and delivery process
- Migrated the codebase to Azure DevOps and implemented continuous integration/continuous delivery (CI/CD)

EDUCATION

COLUMBUS STATE UNIVERSITY

Columbus, GA

Master of Science, Computer Science

(May 2006)

Bachelor of Science, Computer Science

(May 2004)
